

Michael Gullo

Web Developer

- I have been programming for 15+ years and am a recent graduate from the Case Western Reserve University Full Stack program. Currently working full-time as an electronics technician, it is time to pursue my real passion... web dev and programming. I am now seeking full-time employment in that field.
- I am equally enthusiastic about the front-end and back-end. I love it all! Lately I have been working mostly with Javascript, Node, React/Next JS, Express, controllers, databases and RESTful APIs.
- Not only do I take pride in my coding efficiency and proficiency, but I am also always eager to expand my skills into new areas. Solving problems, understanding code and becoming better at programming has become very addictive.

Work Experience

Electronics Technician (Current)

Berk Enterprises, Warren, Ohio

- Repair circuit boards and electrical systems using schematics, wiring diagrams and testing instruments.

Computer Server Design / Maintenance

T2M2, Concord Township, Ohio

- Designed, built, programmed, and maintained 279 cryptocurrency mining servers.

Electronics Technician

Automatic Music, Concord Township, Ohio

- Troubleshooting of mechanical and electrical systems, including component level circuit board repair and aftermarket modifications.
- Extensive experience with technical equipment; including volt meters, ammeters, oscilloscopes, etc.
